

# Expansion Headquarters Pompadour, Bozen

Bolzano, Italy

 **Lindner**

# Project Description

The Italian branch of the German Teekanne Group expanded its headquarters in Bolzano by adding additional office space. Particular importance was attached to a high-quality working environment where employees and customers feel comfortable: Soft lines structure the office zones, acoustically effective elements and striking colours round off the overall impression.

In the new office spaces, Lindner realised ceiling systems with integrated luminaires: In combination with the colour concept, the LED tracks zone the area boundaries – without the use of partition walls. The acoustically effective Lindner heated and chilled ceilings, in parts with deep matt powder coating, ensure a pleasant climate and a quiet working environment. The hollow floor system from Lindner accommodates installations and is free of harmful emissions.

Heated and Chilled Post Cap Ceilings  
Plafotherm® B 100  
Heated and Chilled Plasterboard Ceilings  
Plafotherm® GK HEKDA®

- **Floors**

Calcium Sulphate Panels
