Project Description

The FFHS Campus in the Gleisarena Zurich, directly based at the main railway station, is one of the central locations of the distance learning university in German-speaking Switzerland. There are not only classrooms but also offices of FFHS within this state-of-the-art complex. Lindner was significantly involved in the interior fit-out and design of the interiors with its partition and ceiling systems as well as door elements. The acoustic requirements could be implemented by the use of double-glazed partition elements such as Lindner Life Contour. Floor bulkheads placed at certain points additionally provide better acoustics and noise protection towards the meeting rooms.

The FFHS's clean design is complemented by acoustically effective metal baffle ceilings and plasterboard bulkheads.

Matching the colour, aluminium tubular frame doors provide access to the individual rooms Thanks to the custom-made special frames, all electric installations could be laid completely invisibly. Integrated display holders within the system joint allow screens and monitors to be attached. The electric blind system with encoder technology impresses not only by its functionality but also with excellent design.

General

Building Type	Office Buildings, Facilities for Meetings, Conventions and Conferences, Teaching, Class and Educational Rooms, Universities and Higher Education Buildings, Industrial and commercial construction
Company Division	Lindner SE Arnstorf | Branch Opfikon
Completition	2020 - 2021

Client | FFHS Fernhochschule Schweiz

Completed Works

- **Partitions**

  Partition Systems Glass
  Lindner Life Contour 126

- **Ceilings**

  Baffle Ceilings

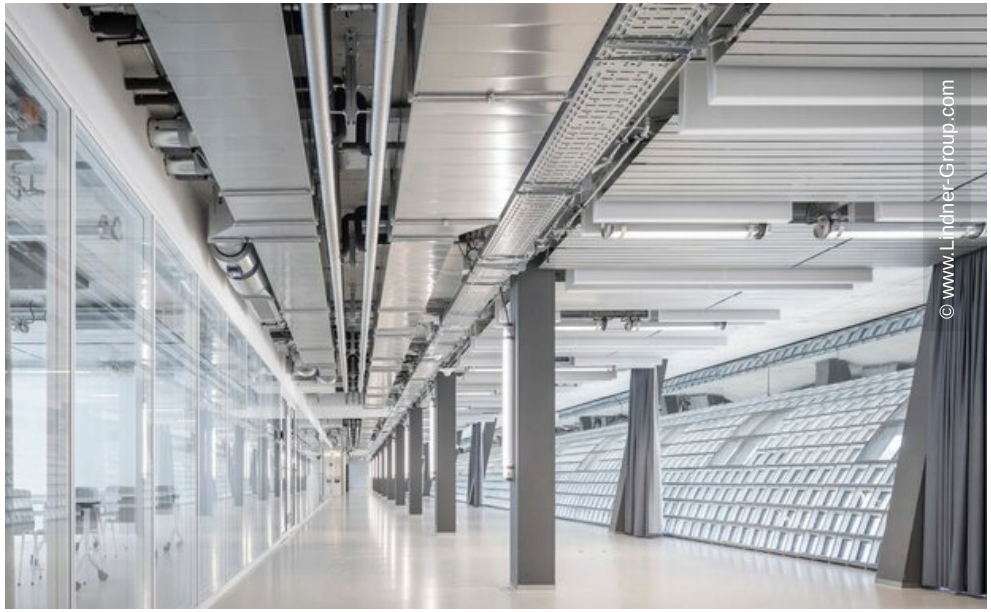

- **Doors**

  Aluminium Tubular Frame Doors
