

Quartier Heidestrasse, Berlin - Fit-Out

QH CORE

Berlin, Germany

Project Description

Quartier Heidestrasse in the heart of Berlin is one of the many major projects for which Lindner SE was commissioned as a reliable full-service provider. With the QH Core, QH Spring and QH Track, Lindner received orders for numerous sub-projects of the construction project. With the signing of the contract in 2020, the foundation stone has already been laid for many years of cooperation until 2023. QH Core, with its eye-catching brick facade, fits ideally into the Berlin cityscape and perfectly reflects the neo-modern industrial character of the former railway and commercial area.

QH Core includes offices, flats, restaurants as well as retail space. Here, Lindner was not only responsible for the interior fit-out, but also supplied and installed products from its own production - including various Lindner partition systems, doors, hollow and raised floor systems, as well as ceiling systems.

The landscaped inner courtyard around which the building is built forms the centre and tranquillity of the complex. Here, residential tenants enjoy a wonderful view of the greenery, while the offices and other usable areas face Heidestraße.
