

IMS Brunn

Brunn am Gebirge, Austria

Project Description

The "IMS Nanofabrication GmbH", an internationally active high-tech company ordered the construction of their new headquarters in Brunn am Gebirge. The new location, which has offices, production, warehouse and cafeteria, provides 260 jobs.

Lindner was once again able to prove itself as the general contractor for the interior fit-out and was able to successfully carry out several trades at the same time.

Among the modern installed floor coverings, there are our hollow and raised floor systems. Our metal heating and cooling ceilings ensure a pleasant room temperature in the modern open-space office concepts.
