

International Market Place

Honolulu, United States

© www.Lindner-Group.com

Project Description

Innovation meets FM Global code requirements in Hawaii's International Market Place Sea Shell design motif. Around and round the baffles go, a radial layout of the baffles throughout 3 stories in the newly erected International Market Place Mall created an eye catching one of a kind ceiling system. Baffles with trapezoidal closure panel in between dressed up the escalator atrium with a rich dark Ruby Ipe wood finish.
