Project Description

The Business Garden, realised by the real estate organisation Vastint, is a new innovative office complex that has been built in various European countries such as Poland, Romania, Lithuania and Latvia. In the Latvian capital Riga, a modern office park with numerous green spaces and retreats came to life.

In cooperation with the partner EcoGridas, Lindner contributed to the interior fit-out of the office complex and installed around 14,000 m² of the NORTEC raised floor system. In order to offer the future tenants maximum walking comfort, the floor panels were made in a thicker version according to the customer's wishes.
