Project Description

New headquarters for Creos Luxembourg S.A., owner and operator of electricity and natural gas networks in Luxembourg: The two-part building complex in Merl houses the administration, various workshops, the warehouse and the garage of the operations centre on a total area of 19,400 m^2.

The company headquarters combines sustainability and energy efficiency to a particularly high degree: The building is DGNB Platinum certified and meets the BBB (low energy) and CCC (energy efficiency) standards. Lindner made a significant contribution to this with its sustainable interior fit-out: Many of the products installed, such as the NORTEC raised floor and the FLOOR and more® hollow floor, are Cradle to Cradle Certified® Silver. The Lindner Life Stereo glass partition system installed in the offices is also Cradle to Cradle Certified® Silver, the expanded metal ceiling is Cradle to Cradle Certified® Gold. Further solid wood and metal partitions provide separation and privacy throughout the building. However, the Corona pandemic presented Lindner with some challenges during the construction of the new headquarters: It was necessary to react quickly to delays in the supply chain and to adapt the on-site assembly process to the new health and safety regulations. Despite these unexpected challenges, the well-functioning project team was able to complete the construction site to the full satisfaction of the architects and the client.

General

Building Type	Administration Buildings
Company Division	Lindner Luxembourg S.à.r.l.
Completition	2021 - 2020

Architect	M3 Architects
Construction Management	Creos Luxembourg S.A.
