

Urbo Business Center

Sra. da Hora, Portugal

Project Description

A new landmark adorns the province of Matosinhos in the greater Porto area – the Urbo Business Centre. With eight floors and a total area of 25,600 m², the building combines design with functionality. The new office and service complex meets various sustainability guidelines.

The focus of the project primarily was on creating spatial efficiency: The building adapts to the changing needs of the users – while paying attention to a visually appealing appearance.

Lindner installed around 17,000 m² of the LIGNA flooring system in the office areas of the business centre: The modular floor panels contribute to the spatial flexibility of the offices as they allow direct access to the floor cavities and facilitate easy maintenance of installations

Completed Works

- **Floors**
