Project Description

The five-star mk | hotel tirana opened in 2021 in the Albanian capital Tirana and has since welcomed numerous private and business travellers. The 80 rooms have been furnished with exclusive design elements and high-quality materials, creating a "home away from home". The rooms are complemented by a wide range of leisure and recreational facilities: a freshwater pool, a gym, a café bar, a restaurant as well as the terrace overlooking the associated gardens make every stay something very special.

As a subsidiary of the Lindner Group, it was almost a matter of course for the mk | hotel in Tirana that the hotel construction would also be handled by Lindner: Lindner Albania was thus responsible for the entire construction. High-quality Lindner ceiling systems make the luxury hotel an architectural highlight – including baffle ceilings, expanded metal ceilings and canopy ceilings. The eye-catcher of the building is the customised ceiling with TOUCHdesign Lunar surface: The high-gloss surface made of hammered stainless steel reflects the hustle and bustle of the hotel and provides an extraordinary play of light.
