Project Description

In order to accommodate 300 employees in one building, PICHLER projects commissioned the construction of a 7.500 m^2 building in the centre of Bolzano's industrial zone. Today, the Park Edison business park combines office and exhibition spaces on six floors.

The Lindner Group was commissioned to manufacture high-quality ceiling systems for the extension of the office complex. In cooperation with Fkontract, 6.000 m^2 of the innovative Lindner Plafotherm® heating and cooling ceilings were installed. Thanks to their intelligent heating and cooling technology, the ceiling systems make a significant contribution to a pleasant indoor climate. The cosiness is also enhanced by AirBox supply and exhaust air elements, which ensure optimum ventilation of the room. In order to create an acoustically optimised environment, particularly in the office and meeting rooms, the ceiling panels were also fitted with acoustic inserts. Finished with a deep matte MOODline powder coating in grey and white, the ceiling systems create a visual highlight in the office rooms.

General

Building Type	Office Buildings, Industrial and commercial construction
Company Division	Lindner SE I Interior Product Supply
Completition	2021 - 2022
Architect	Pichler Architects GmbH
Partner	Fkontract GmbH | www.fkontract.com

Completed Works

- **Ceilings**

  Heated and Chilled Post Cap Ceilings
  Plafotherm® B 100
  Heated and Chilled Hook-On Ceilings
  Plafotherm® E 200
  Powder Coating
  MOODline
  Ventilation Components
  AirBox E
