

# Merkur City Office

Graz, Austria

# Project Description

The Merkur City Office project in Graz involved the revitalisation and expansion of a historic Wilhelminian-style building ensemble, which now offers space for 15 prestigious office and retail areas.

The ensemble consists of three adjoining five- to six-storey buildings that were brought together over time. In addition to a fundamental refurbishment of the existing areas, the top floors were also extended and converted into office space. The aim was to combine and reinterpret contemporary working environments with historical flair.

As part of this project, Lindner GmbH is setting new standards in interior design and represents a new era in the construction industry. The installation of used, recycled raised floor panels saves resources and avoids waste. The RELIFE raised floor system offers the same high quality and durability as newly produced systems. By using the RELIFE system, a modern and flexible interior design was realised and a significant reduction in the ecological footprint was achieved.

In addition to RELIFE, the LIGNA raised floor made of wood-based panels was used.

The dry hollow floor FLOOR and more® from Lindner impresses with its high load-bearing capacity, good acoustic performance and high smoke tightness - an ideal solution for use in historic old buildings. Lindner floor systems create the perfect conditions for modern office spaces by not only providing sufficient space for installations and technology in the floor cavities, but also levelling out unevenness in the building structure. In addition, they provide sufficient design freedom to adapt to the historical charm of the building.

The elegant Lindner Life Pure 620 wall solution adds the finishing touch to the individual offices. This solution creates an open and bright look and thus offers an outstanding working environment.

## General

<b>Building Type</b>	Office Buildings, Facilities for Meetings, Conventions and Conferences, Industrial and commercial construction
<b>Company Division</b>	Lindner GmbH   Doors, Lindner SE   Partitions
<b>Completion</b>	2022 - 2023
<b>Client</b>	Merkur Versicherungen AG

# Completed Works

- **Floors**

Chipboard Panels	
LIGNA	460 sqm
Calcium Sulphate Panels	
FLOOR and more®	3350 sqm
Refurbished Chipboard Panels	
RELIFFE	2330 sqm
Floor Coverings	

- **Partitions**

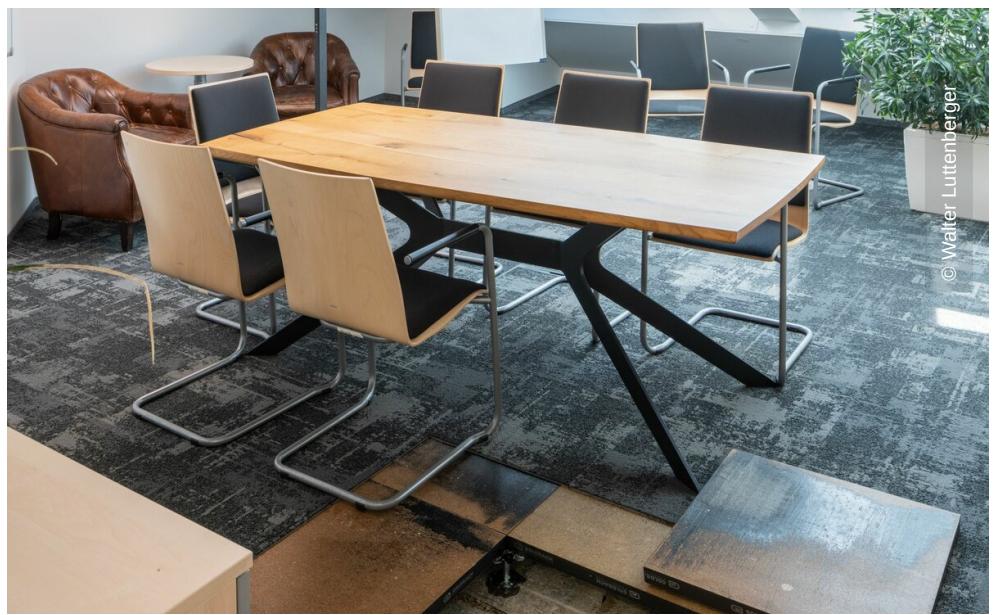

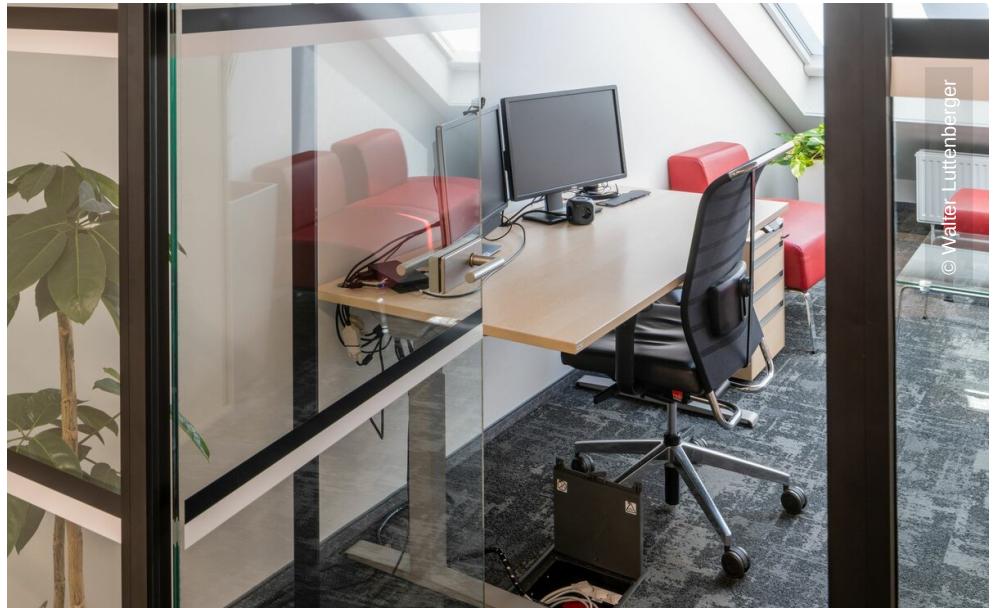

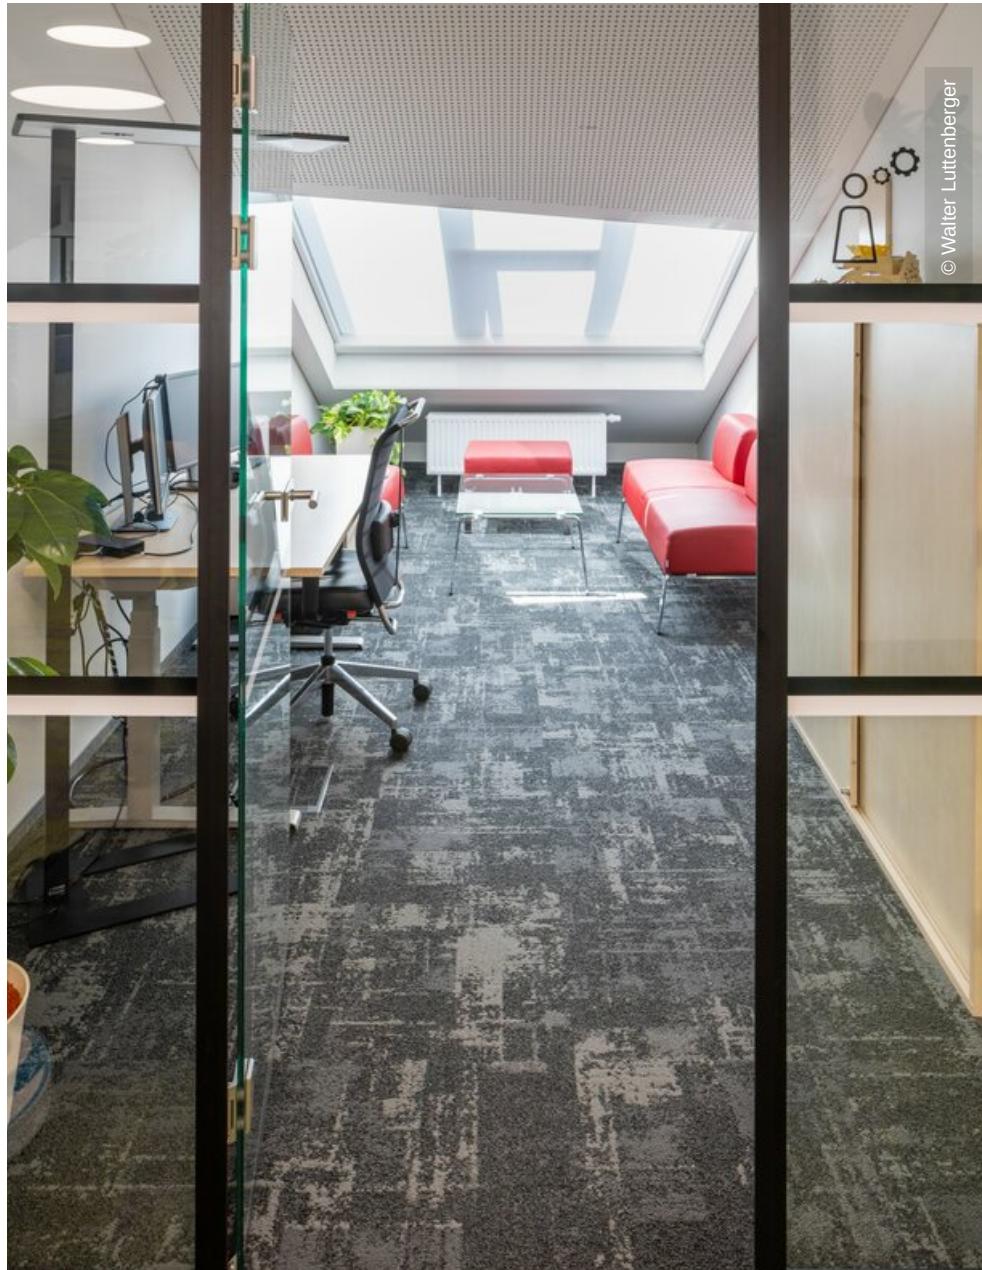

Partition Systems Glass	
Lindner Life Pure 620	250 sqm
Lindner Life Stereo 125	90 sqm

- **Doors**

Glass doors	
GTB 100	14 Pcs.
GTB 13	50 Pcs.
Aluminium Tubular Frame Doors	
ATB 68	20 Pcs.
