Project Description

On the former Renault site in Regensdorf, a new six-storey office and commercial building has being erected, which – thanks to innovative energy and construction concepts – impresses with a sustainable building method.

As part of this project for Volvo Cars Switzerland AG, Lindner provided innovative solutions for the interior fit-out of the third floor. System partition walls made of glass and wood as well as fitting doors create an undisturbed working environment in the offices, thanks to high sound insulation. The modular wall systems can be flexibly installed and allow for individual room design options: Lindner therefore meets Volvo's modern requirements for flexible and communicative workspaces. Coloured partition wall systems also set colourful accents in the building and increase the well-being of employees.

General

Building Type	Office Buildings, Industrial and commercial construction
Company Division	Lindner SE Arnstorf | Branch Opfikon
Completition	2023

Completed Works

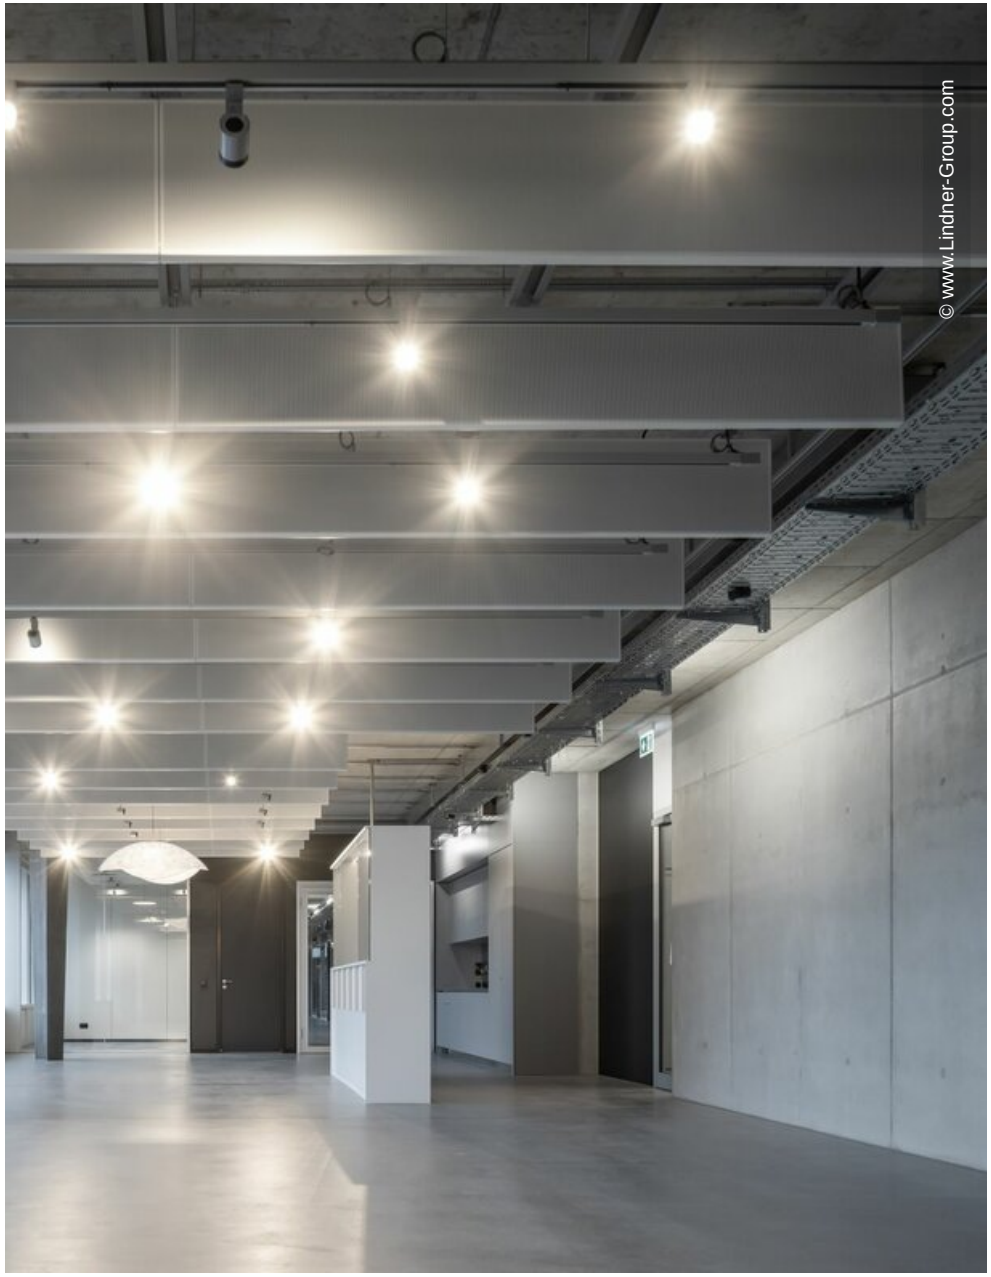

- **Partitions**

  Partition Systems Glass
  Lindner Life Clear

  Partition Systems Full Panel
