

# Torhaus Expopark MS4

Hannover, Germany

## Project Description

The Torhaus Expopark – designed by the architectural firm BKSP – is a new office and administration building located in the Expo Park in Hannover, serving as a representative entryway to the entire complex. Spanning an area of 9.500 m<sup>2</sup>, the Torhaus offers customisable office spaces and is notable for its proximity to restaurants, supermarkets, and other businesses within the dynamic commercial park. In addition to a high technical building standard, the Torhaus also combines energy efficiency and comfort within the building through an innovative access concept and tailored building technology.

The Lindner Group played a pivotal role in realising the modern work environment with its execution of the interior fit-out. Various ceiling systems meet high technical demands: while metal ceilings contribute to the overall aesthetic and provide sound insulation, installed heated and chilled ceilings are a key element for an energy-efficient temperature management of the building. Flexible system partition walls ensure variable room division, adapting to the changing needs of everyday office life. To further increase efficiency and comfort, various floor systems were installed to facilitate easy integration of electrical installations.

## General

<b>Building Type</b>	Office buildings
<b>Company Division</b>	Lindner SE   Fit-Out North.Northwest Germany
<b>Completion</b>	2021 - 2023
<b>Client</b>	Projektgesellschaft GmbH & Co – Mailänder Straße – KG
<b>Project Controller</b>	Delta Bau AG

## Completed Works

- **Ceilings**  
Heated and Chilled Post Cap Ceilings  
Plafotherm® B 100
- **Floors**  
Calcium sulphate panels  
FLOOR and more®  
FLOOR and more® power  
Calcium Sulphate Panels  
NORTEC
- **Partitions**
