Nytt Konserthus | Stavanger

Stavanger, Norway

Lindner

Lindner

Project Description

The Lindner Group is working on the two currently running constructions of the concert halls in Norway. The interior fitting of the concert hall in Stavanger includes high quality and mostly acoustically active surfaces in the concert hall, the multifunctional hall and the foyer. The concert hall is dominated by the balustrades and the vertical wall cladding, oiled with Canadian maple. A particular challenge is the 170 tonne mobile concert hall ceiling, built of NORIT industry panels.

General

Building Type	Cinemas and Multiplex Theatres, Concert Halls, Theatres and Opera Houses, Cultural buildings, Sports and recreational facilities
