

Monastère de Mallersdorf

Mallersdorf, Allemagne

Description du projet

The traditional convent Mallersdorf has several in-house businesses, including a school. In order to provide the students with an attractive learning environment in the future, these premises were carefully renovated within the listed building structure. Lindner contributed to this measure with underfloor heating and dry screed. Special project requirements in the areas of statics, fire protection, sound insulation and indoor humidity had to be considered.
