

Rénovation d'un appartement – Ludwigstraße

Passau, Allemagne

 **Lindner**

© www.Lindner-Group.com

Description du projet

The old building apartment is located directly in the pedestrian zone in Passau. According to the wishes of the owner, the apartment was designed ultra-modern. Among other things, 130 m² of our NORIT-TE 30 Therm GF underfloor heating were installed. Thus, in a very short time, it was possible to heat the rooms invisible without the visual impact of conventional radiators.

A real eye-catcher in this project is not only the modern design, but also the special floor coating, which was chosen instead of a parquet floor covering.
