

A long, modern hallway with a dark ceiling and walls. The ceiling is equipped with numerous recessed spotlights and circular air vents. The floor is covered in a grey carpet, with a large, vibrant red circular rug in the foreground. On the left, there are glass-walled offices or residential units. One of the glass panels has the word "STADAB" illuminated in white. Another glass panel further down has the letters "BB" visible. The hallway leads to a brightly lit area at the end, possibly a common area or entrance.

**OFFICE AND RESIDENTIAL COMPLEX
BASELER PLATZ**

FRANKFURT, GERMANY

Description:

As early as 2002, Lindner was awarded the overall contract for the interior fit-out on 6 floors of the Baseler Platz office and residential complex. These were fitted with glass partitions and 3 m high special corridor door elements - cross veneered in cherry with side panels. Lindner also carried out the raised floor system. Following this order, several customised tenant fit-outs in the form of additional glass partitions, door elements and interior fit-outs were realised. In 2019, after several changes of tenants, the order for the revitalisation followed: In addition to the dismantling and conversion, this also included the new delivery of glass partitions and doors for floors 4 to 6. Black-powdered glass partitions and door systems with side panels were also supplied specifically for the main tenant "Bettzeit". Lindner also carried out all conversion work in the raised floor area. In spring 2020, another follow-up order was received for the tenant fit-out for Deutsche Bahn on floors 1 and 2.
