

# DIN-OFFICE

BERLIN, GERMANY

## Description:

Over 100 years of the German Institute for Standardisation e. V. (DIN), of which the headquarters on Burggrafenstraße in Berlin has been in existence for around 50 years - reasons enough to tackle both a complete (energy-related) renovation of the ensemble (with parts of the building dating from the 1960s - 1990s) and to design a completely new working environment for the approximately 700 employees. The aim was to use the appropriate structural framework to drive forward the change in DIN's internal organisation and thus "new standards" for the 21st century. For this purpose, the small-scale floor plans were removed and the building was reduced to its basic static structure. The exterior facade was also newly "clad" and extended with a risalit over 10 storeys. Now the new DIN building, designed by Kim Nalleweg Architekten & klm-Architekten Berlin, appears as a calm, monolithic block with a prominent main entrance with open foyer, staff restaurant and roof terrace.

In 2019, the Lindner Group was awarded the contract for the expansion of the office worlds, including the upgrading of the building services and all electrical trades. In just 19 months, around 20,000 m<sup>2</sup> were transformed into modern, colour-coordinated working worlds with various workplace situations. In addition to high design standards, the focus was on a high level of room comfort and efficient function. Here, Lindner was not only responsible for the fit-out, but also supplied a large part of the installed systems, such as metal ceilings, partly installed as heating/cooling elements, or acoustically optimised wall panels. The work and meeting areas were separated with GK partitions, supplemented with Lindner glass partitions or wall elements with wooden surfaces. The wooden doors and door elements in smoked oak also come from Lindner, as does special furniture for the newly designed meeting and break zones. The project management according to lean construction methods ensured a smooth, on-time process. Thanks to collaborative and transparent planning and control, the project was successfully completed as a team, despite all the challenges that renovation entails.

## General:

Concept/Product:	.....
Building Type:	
Client:	DIN e.V.
Project Controller:	BJP Ingenieure Leipzig
General Planning:	KLM Architekten
TGA-Planung:	Winter Ingenieure
Company Division:	Lindner Isoliertechnik & Industrieservice GmbH, Lindner SE   Building Services Engineering, Lindner SE   Fit-Out Central.East Germany
Completion:	2019 - 2021

## Completed Works:

- Screed works**
- Floor coating works**
- Plastering works**
- Painter, paperhanging and varnishing works**
- Tiling and flagstone works**
- Natural and artificial stone works**
- Steel construction works**
- Outside facilities**
- Sanitary**
- Building Services**
- Insulation works**
- Fire Protection**
- Steel Construction Works**
- Furniture**
  - Special Furniture
- Plasterboard ceiling systems**
  - Plasterboard ceilings
- Plasterboard partition systems**
  - Metal stud plasterboard partition systems
- Parements**
- Heated and chilled metal ceilings**
- F0 Metal ceiling**
  - LMD-E - Hook-on/Corridor ceilings
- Glass partitions**
  - Lindner Life Stereo 125
- Solid partitions**
  - Lindner Logic 100 Timber
- Wall claddings**
  - Metal acoustic elements
- Movable partitions**
- Doors**
  - Tubular Frame Doors
- Wooden doors**
  - Commercial doors
